On 7 September 1953, no change was observed in the status of aircraft and personnel at Aspern (P 49/X 49) airfield. There was no air activity between 10 a.m. and 3 p.m. A take-off strip was marked by small flags. No activity was observed near the Pe-2s. The previous assumption that at least some planes were not capable of flying was confirmed by the observation that the rudder assemblies of four Pe-2s were missing.

25X1

Comment. Aspern airfield is occupied by a fighter regiment.
